WARNING!Before carrying out any operations with the unit,carefully read this instruction manual and keep it with care for future reference, It contains important information about the installation, user and maintenance of the unit.

## SAFETY

General instruction
-The products referred to in this manual conform to the European Community Directives and are therefore marked wihth CE.
-The unit is supplied with hazardous network voltage (230V~) .Leave serving to skilled personnel only. Never make any modifications on the unit not described in this instruction manual,otherwise you will risk an electric shock
-Connection must be made to power supply system fitted with efficient earthing (Class I appliance acc ording to standard EN60598-1).It is moreover,recommended to protect the supply lines of the units from indirect contact and/or shorting to earth by using appropriately sized residual current devices.
-The connection to the main network of electric distribution must be carried out by a qualified electrical installer.Check that the main frequency and voltage correspond to those for which the unit is designed as given on the electrical data lable.
-This unit is not for home use,only professional applications.
-Never use the fixture under the following conditions:

- in places subject to vibrations or bumps;
- in places with a temperature of over $40^{\circ} \mathrm{C}$.
-Make certain that no inflammable liquids, water ot metal objects enter the fixture,
-Do not dismantle or modify the fixture.
-All work must always be carried out by qualified technical personnel.Contact the nearest sales point for an inspection or contact the manufacturer directly.
-If the unit is to be put out of operation definitively, take it to a local recyling -
plant for a dosposal which is not harmful to the environment.
A

Warnings and installation precautions
-If this device will be operated in any way different to the one described in this manual,it may suffer damage and the guarantee becomes void.Furthermore,any operation may lead to dangers like short circuit,burns,electric shock,etc.
-Before starting any maintenance work or cleaning the fixture,cut off power from the main supply.
-Always additionally secure the fixture with the safety rope. When carrying out any work,always comply scrupulously with all the regulations (particularly regarding safety) currently in force in the country in which the fixture's being used.
-Install the fixture in a well ventilated place.
-Keep any inflammable materials at a safe distance from the fixture.
-Shields,lenses or ultraviolet screens shall be changed if they have become damaged to such an extent that their effectiveness is impaired.
-The lamp (LED) shall be changed if it has become damaged or thermally deformed.
-Never look directly at the light beam.Please note that fast changes in lighting,e.g. flashing light,may
trigger epileptic seizures in photosensitive persons or persons with epilepsy.
-Do not touch the product's housing when operating because it may be very hot.

## INTRODUCTION

## FEATURES

| DMX Channel(-) |  |  |  |  |  |
| :---: | :--- | :---: | :---: | :---: | :---: |
| 1-CH | Function | Value | Percent/Setting | Remark |  |
| 1 | Dimmer | $000-255$ | $0 \sim 100 \%$ |  |  |

- 147W 2800K bi-color COB LED(WW/Amber)
- Advanced optical system delivers a super high output of $106001 m$ - CRI $\geq 90$
- Fan-free design and quiet operation suitable for studio use
- Selectable PWM frequency for flicker-free video with any camera
. 4 dimming curves with 16 -bit control for smooth dimming
- Consistent color temperature throughout the dimming curve
- Built-in macros make for easy programming of stunning effects
- Rugged touring-grade design with optional $1^{*} 4$ or $2 * 2$ master brackets (sold separatly) to achieve versatile mounting options

## MAINTENANCE AND CLEANING THE UNIT

- Make sure the area below the installation place is free from unwanted person during setup.
- Switch off the unit, unplug the main cable and wait till the unit has cooled down.
- All screws used for installing the device and any of its parts should be tightly fastened and should not be corroded
Housings,fixations and installation spots (celling,trusses,suspensions) should be totally free from any deformation.
- The main cables must be in impeccable condition and should be replaced immediately even when a small problem is detected
It is recommended to clean the front at regular intervals,from impurities caused by dust,smoke,or other particles to ensure that the ligh is radiated at maximum brightness.For cleaning,disconnect the main plug from the socket.Use a soft,clean cloth moistened with a mild detergent.Then carefully wipe the parts dry. For cleaning other housing parts use only a soft,clean cloth.Never use a liquid,it might pernetrate the unit and cause damage to it.

## FUSE REPLACEMENT

1.Disconnect this product from the power outlet
2.Using a screwdriver, unscrew the fuse holder cap from the housing
3.Remove the blown fuse and replace with a good fuse of the same type and rat -ing (250V/T3.15A)
4.Screw the fuse holder cap back in place and reconnect power

TROUBLESHOOTING

| Problems | Possible causes | Checks and remedies |
| :--- | :--- | :--- |
| Fixture does not light up | - No mains supply | - Check the power supply voltage |
|  | - Dimmer fader set to 0 | - Increase the value of the dimmer channels |
|  | - Faulty LED | - Replace the LED board |
|  | - Faulty LED board | - Replace the LED board |
| General low light intensity | - Dirty lens assembly | - Misaligned lens assembly |

Contact an authorized service center in case of technical problems or not reported in the above table cannot be resolved by the procedure given in the table.
